

Why Choose St. Camillus Therapy?

OUR COMPREHENSIVE TEAM OF OCCUPATIONAL, PHYSICAL, AND SPEECH THERAPISTS OFFER SPECIALTY THERAPIES INCLUDING LYMPHEDEMA, KINESIOTAPING AND LSVT THERAPY TREATMENT!

LYMPHEDEMA

When the lymphatic system is not able to keep up with the body's demands, fluid can accumulate in the tissue and swelling occurs. The swelling is called lymphedema and can occur in both arms and legs.

St. Camillus' approach to lymphedema management include:

- Massage
- Compression through bandaging
- Utilizing compression stockings
- Light exercise and movement

KINESIOTAPING

The Kinesiotaping method is a rehabilitative taping technique that is designed to facilitate the body's natural healing process while providing support and stability to muscles and joints without restricting the body's range of motion.

Kinesiotaping is safe and successfully treats a variety of orthopedic, neuromuscular, neurological and other medical conditions. It has been proven to have positive physiological effects on the skin, lymphatic and circulatory system, fascia, muscles, ligaments, tendons, and joints.

LSVT BIG AND LOUD

LSVT Big and Loud are effective treatments for those diagnosed with Parkinson's disease or other Neurological conditions.

Meet our Therapy Team!

St. Camillus provides our patients with a specialized therapeutic approach to rehab based upon individual unique needs. We offer physical therapy, occupational therapy, and speech-language pathology therapy to assist in managing a wide range of challenging medical conditions in a variety of settings.

With an interdisciplinary team, our goal is to assist our patients and residents with a one-on-one individualized approach to regain independence and improve quality of life.

HEAR FROM AN ACTUAL THERAPY PATIENT

“It is like a miracle and magic all wrapped up into one. Within a week and a half of doing the massage routine Amy recommended for me, my leg, ankle and foot were 80% better and within another week back to normal size!” - Noelle, St. Camillus Home Health Therapy patient
